You did great as a PO. You were very kind, professional, thorough, and welcoming.

I have one critique and it occurred during the question portions. This may go beyond your control, but I think you could do a little better controlling the aggressive questioners. A lot of the time the questioners would cut off the speakers and we couldn't hear their responses, which ultimately could affect that speaker's score.

Good job addressing the 4-6 week campaign period in Section B.

1. You pointed out potential negative effects like special interest group influence and corruption risks, referencing Forbes 2022.
2. Your remarks on voter knowledge and conflicts of interest were pertinent.

In CX, you rightly noted that brief campaigns hinder voter understanding of candidates and acknowledged existing corruption issues. Well articulated!

**Speech #2 -- Score:** 7

Great speech and delivery. Your arguments were solid, particularly on watershed effectsâ€”addressing drinking water, soil stability, and marine life. You effectively countered the Coleman climate change argument and highlighted the broader impacts of air pollution.

In the CX, you clearly explained the bill's focus on population centers and resource allocation, demonstrating strong understanding and communication. Well done!

**Speech #3 -- Score:** 5

You did an excellent job detailing the usefulness of embryonic research, especially with your citation from the Mayo Clinic, which lends authority to your argument. The inclusion of a personal example to illustrate the benefits was particularly impactful, making your case stronger.

In the CX, nice job maintaining composure w/ challenging questions. Addressing why treatment might not be sought abroad could refine your argument further, yet your overall performance was strong and effectively communicated the importance of your topic. Great work!
